RECOMMENDED

PURCHASE ORDERS

FASTER REACTIONS FOR TOMORROW'S DEMAND

Better automation means faster reaction times. Consumers are expecting the best variety of products at a lower price with fast delivery times which requires the right level of inventory without accumulating too much stock. Reduce stockouts, streamline operations and improve customer experience with smart recommendations and automated purchase orders.

22% DECREASE IN STOCKOUTS

18% REDUCTION IN INBOUND SHIPPING COSTS

20% INCREASE IN ON-TIME PERFORMANCE

AI-POWERED, ACCURATE, AUTOMATED OPERATIONS

Today's retailers are challenged with limited resources to analyze and make accurate decisions from mass amounts of data, creating the critical need for automation. Gain an integral advantage with AI to analyze demand, understand supply patterns and predict the right amount of inventory required at the right place.

IMPROVE CASH FLOW

Better use of employee's time and resources improves operational efficiency and optimizes cash flow

AUTOMATE PROCESSES & OPERATIONS

Remove time-consuming, redundant tasks and the risk of human error with accurate, automated and data-informed purchase orders

REMOVE NON-MOVING INVENTORY

Gain insights into slow moving inventory with proactive forecasting to react faster to changes that occur in supply and demand

REDUCE STOCKOUTS

AI-powered, recommended stock levels to maintain the right level of buffer stock at the lowest cost possible
