CRITICAL PARTS

TRACKING

ON-TIME PRODUCTION INSURANCE

Critical parts are custom made with long lead times from ordering to delivery and can severely compromise production. ConverSight delivers need-to-know insights and alerts on the status of mission critical parts to remove disturbances in product planning and improve on-time delivery.

 **INCREASE IN UPTIME**

 **GAIN LABOR AND COST EFFICIENCIES**

 **ACHIEVE ON-TIME DELIVERY**

MITIGATE RISK WITH THE POWER OF AI

Identify parts that should be considered critical with a plan in place to receive them quickly from the supplier and reduce emergency orders, production disruptions, and carrying costs.

→ PROACTIVE INSIGHTS TO STREAMLINE PRODUCTION

Get insights into changes in demand for parts and shipment delays to proactively identify shortages and analyze on-hand, allocated, and on-order inventory along with demand forecasts

SUPPLIER RISK ANALYSIS

Analyze the reliability of the supplier to meet the expected lead time for the part to coordinate the arrival of the part and inform the decision to stock the item as part of the inventory

END-TO-END VISIBILITY

Receive visibility into distributed teams like sourcing, procurement, operations, logistics and sales, to proactively alert on potential delays due to unavailability of critical parts and supplier delays
