MANUFACTURING

CAPACITY PLANNING

END-TO-END VISIBILITY INTO YOUR PROCESSES

As manufacturers continue to navigate the choppy waters of today's supply chains, businesses are turning to proactive and augmented data to gain full visibility into their procurement and production processes. Manufacturers must recognize gaps in their system and visibility to achieve agility and responsiveness.

ACCURATE PLANNING WITH CONVERSATIONAL AI

Manufacturers require 24/7 insight into their processes to shore up their demand supply, critical parts tracking, labor productivity, and more. ConverSight provides instant and proactive insights to minimize costs and plan a way forward.

SUPPLY PLANNING

Get instant visibility into supply forecasts, including part shortages, build quantities, and critical parts tracking. Make instant decisions and design current and future plans with proactive data.

BOM HIERARCHY

Nail down your Demand Planning to produce an accurate Build of Material (BOM) hierarchy, built with integrated data from across your networks.

CAPACITY PLANNING & TRACKING

Analyze capacity vs. actual data, as well as labor productivity across your procurement and resource network.

RECOMMENDED BUILD PLANS

Receive recommended build plans that align with your capacity and products scheduled based on demand, current inventory and parts availability.
