INCREASED VISIBILITY WITH AI & ANALYTICS

CUT ACROSS YOUR DATA NETWORK WITH AI

As customer behaviors and trends change daily, logistics plans require instant and accurate data from all ends of the supply network; customers, carriers, regions, and more. Conversational AI collects and augments your data, telling a bigger story to drive accurate logistics plans and forecasts.

LOGISTICS PLANS WITH PROACTIVE PERFORMANCE METRICS

ConverSight provides access to instant reporting with comparable analytics across your procurement and customer networks. Access data to compare cost, weight and revenue between customers, carriers, mode and geography in a centralized dashboard.

REAL-TIME TRACKING

ConverSight provides real-time tracking of deliveries, enabling logistics companies to track their vehicles and shipments, and respond to any issues quickly.

TREND ANALYSIS

ConverSight can provide insights into trends and patterns in logistics operations, enabling companies to make informed decisions about their operations.

PERFORMANCE MEASUREMENT

ConverSight measures key performance indicators (KPIs) such as delivery time, fleet utilization, and operating costs.

COST OPTIMIZATION

The platform can provide data-driven insights into areas where logistics companies can reduce costs and increase efficiency.
