# INVENTORY

# OPTIMIZATION

## AVOID EXCESS INVENTORY AND STOCKOUTS

Avoid overstocking or shortages with real-time visibility into supply plans for informed inventory management and streamlined product scheduling with predictive analytics. Reduce risk, lead times and strike the perfect balance of component and finished goods across locations.

**35%** REDUCTION IN INVENTORY COSTS

**28%** REDUCTION IN STOCKOUTS

**25%** INCREASE IN ON-TIME PERFORMANCE

## ALIGN PRODUCTION CAPACITY WITH DEMAND

With ConverSight, leaders gain real-time visibility into supply chains to know exactly how much inventory is on hand and when. Improve service levels, streamline production and improve cash flow by kicking slow-moving or obsolete inventory to the curb.

### SUPPLY PLANNER

ConverSight's Supply Planner provides what-if scenario planning and write-back functionality, giving power and visibility to supply chains.

### IDENTIFY SLOW-MOVING INVENTORY

Identify excess inventory or slow-moving and obsolete items that are tying up cash flow.

### MATERIAL REQUIREMENTS PLANNING

ConverSight provides Material Requirements Planning visibility and predictive insights to understand resources required to avoid gaps.
